

To the FCC:

I chose to pay for XM Satellite Radio and it's attendant products because it is my right to do so. If they want to broadcast traffic and weather information and charge me for same then it should not be any group's business but theirs and mine. For the NAB to attempt to interject their self serving petition, 04-160, is nothing but an attempt by them to cover up the fact that there is a growing population in this country that are unhappy with the content of the NAB daily broadcasts. If the NAB is so upset with what XM Radio offers to the purchasing public let them, NAB, alter the product they sell and produce something that people are willing to listen to. Since I purchased my XM Radio system I doubt very much that I have spent more than 10 minutes per day listening to AM or FM radio.

I oppose passage of the NAB petition 04-160
